

FINAL RECOMMENDATION

#CONTINUITY AUDIT

This is the part where we stop pretending the lore doesn't have glorious, manageable chaos.

A. RESOLVED OR ACCEPTABLY FRAMED PARADOXES

These are **not problems**, they are canon features.

1. DOCTOR VORST AS ABSENT AND CAUSAL

- **Status:** Resolved in-text
- **Current handling:** "RESOLVED — BOTH TRUE"
- **Why it works:** The setting explicitly allows paradoxical causality through temporal fracture and narrative collapse.

2. PROFESSOR AS BOTH HISTORICAL ROLF AND ARCHETYPAL VELVET ARCHIVIST

- **Status:** Resolved as mythic duality
- **Why it works:** The world supports archetypal overlay and synchronic identity.

3. VUORSE AS GLITCH-BORN BUT SOUL-LINE SUCCESSOR

- **Status:** Resolved
 - **Why it works:** The soul-line is metaphysical, not strictly biological.
-

B. SOFT AMBIGUITIES THAT ARE PRODUCTIVE

These are good mysteries, but should be tracked.

1. EXACT SUCCESSION CHAIN OF THE SOUL-LINE

- **Issue:** Not every generational handoff is explicit.

- **Current state:** Hildebrand → Margarethe → Velma echo → Lysander → Theresia → Lisette/Professor/VUORSE is implied but not fully mapped.
- **Recommendation:** Add a `succession_order` field in `lineages`.

2. RELATIONSHIP OF YSSEDA, SIGISMUND, ISOLDE, AND LUDOLF TO THE MAIN BLOODLINE CHRONOLOGY

- **Issue:** They are clearly lineage figures but not chronologically pinned.
- **Recommendation:** Add `approximate_sequence` or `family_branch`.

3. WYLUS KALYNDROS

- **Issue:** Mentioned once, structurally important-sounding, almost no canon data.
- **Recommendation:** Keep as hook, maybe tag possible-meta-echo.

4. THE 747 SCROLLS

- **Issue:** Named but content unknown.
 - **Recommendation:** Good candidate for future document expansion.
-

C. STRUCTURAL INCONSISTENCIES NOW CLEANED BUT WORTH NOTING

1. THE - THREAD USED TO BE TYPED AS ARTIFACT

- **Now:** cosmology
- **Compatibility preserved:** `legacy_type: "artifact"`

2. GLAMORONS USED TO BE TYPED AS ARTIFACT

- **Now:** phenomenon
- **Compatibility preserved**

3. GOLDEN-WINGERS-CHARTER USED TO BE TYPED AS ARTIFACT

- **Now:** document
- **Compatibility preserved**

4. MISTRESS-EUPHORIA-BLAZE USED TO BE TREATED AS CHARACTER

- **Now:** persona

- **Compatibility preserved**
-

D. REFERENCED AREAS STILL UNDERDEFINED

1. FEDERKREIS DEVICES

- **Status:** Added as hook entity
- **Need later:** what they do, who built them, whether they interface with sigils, lattice nodes, or mirrors

2. FORBIDDEN SUITCASE

- **Status:** Added as moderate artifact
- **Need later:** contents, sealing reason, opener conditions, relation to 1938

3. SEVEN FISSURES

- **Status:** Added as phenomenon
- **Need later:** names/locations of the other six

4. TEMPORAL DIASPORA

- **Status:** Added as phenomenon
 - **Need later:** list of displaced persons, objects, animals, and institutions
-

E. HISTORICAL COHERENCE NOTES

1. THERESIA AND MARIE ANTOINETTE

- **Potential issue:** “1754” may read like the year of activity rather than birth/era marker.
- **Not a contradiction,** but it could confuse readers.
- **Recommendation:** later split era into start_year, end_year, era_label.

2. JAKE MARKED AS “19TH-CENTURY-WYOMING”

- **Potential issue:** Jake’s narrative also intersects present/meta framing through the Weaver.

- **Not a contradiction:** temporal fissure logic covers it.
- **Recommendation:** add `temporal_status`.

3. TIMELESS ENTITIES IN EVENT CHRONOLOGY

- **Potential issue:** “timeless” is narratively right but structurally messy.
- **Recommendation:** add `event_time_class` with values like `historical`, `timeless`, `meta`, `paradoxical`.

F. SUGGESTED NEXT UPGRADES

If you want this thing to be museum-grade:

- 1 Add `start_year`, `end_year`, `sort_year`
- 2 Add `canon_source_refs` for every creator-supplement entity
- 3 Add branch fields for bloodline subfamilies
- 4 Add `event_time_class`
- 5 Add `succession_order` to soul-line entries
- 6 Add `contains` arrays to archives and places
- 7 Add `open_questions` arrays to hook and sketched entities

The **best next step** is a **v1.3 archival edition** with:

- structured dates,
- branch-aware family trees,
- named fissures,
- and a dedicated `open_questions` field.
