

HUMAN NODES (SEALED DECISIONS)

Use when a character, faction, or institution can materially change a branch.

ACTOR BASIS

Basis	When	Research vs roleplay
evidence	Rich canon dossier exists	Pull canon only; then separate roleplay
mixed	Partial canon + gaps	Canon first; gaps as assumptions; then roleplay
assumption	New / thin / user-invented	Skip dossier research; sealed assumption packet → roleplay

SEAL PROTOCOL

- 1 Freeze a **dossier** from project lore (paths + quotes/paraphrases).
- 2 Build a **temporal packet**: only claims the actor could know/access at the decision cutoff.
- 3 Exclude future spoilers, omniscient narrator facts, and off-stage secrets.
- 4 Roleplay offline from the packet alone. Propose **at least two** actions from a declared decision graph.
- 5 Adjudicate against world edges in the main sim. Label motives/actions simulation.

DECISION GRAPH MINIMUM

Actor: ::NAME::
 Cutoff: ::WHEN::
 Knows: ...
 Does not know: ...

Options:

A — ...

B — ...

C (optional) — ...

Pick a primary action for the main branch; keep at least one alternate branch alive if stakes are high.
