

OPEN THREADS

Undeveloped hooks, contradictions, gaps, and opportunities for expansion.

UNDEVELOPED CHARACTERS

WYLUS KALYNDROS [HOOK ONLY]

- **Source:** [p.76, docs/SLAYVERSE_CHAT_03142026.json]
- Mentioned once as "the elusive webweaver." Relationship to the Weaver is unclear. The 03/14 digest sharpens the question: are Wylus Kalyndros and The Weaver the same entity across different temporal registers, or distinct figures whose roles rhyme? The answer determines whether the Weaver's authority is singular or inherited.
- **Opportunity:** Could be an antagonist, a fallen Weaver, or a figure from before Hildebrand. If they are the same entity displaced, it deepens the soul-line's recursive logic; if distinct, it introduces a rival cosmological authority.

ELI MCCULLEN [HOOK ONLY]

- **Source:** [p.93, p.96, docs/SLAYVERSE_CHAT_03142026.json]
- Jake's grandson. "Thunder in his bones." Pop may have encoded the crystal node's core command structure in Eli's DNA — making Eli not merely a future-generation hook but a **living lattice key**. If true, his body carries the activation sequence for the Wyoming Rift, and his arc becomes inseparable from the Codex Prophecy.
- **Opportunity:** Eli could be the bridge character for a modern-day continuation of the Jake arc. His DNA encoding raises the stakes: he is both heir and instrument, and any faction aware of the lattice will seek him.

LISETTE'S UNNAMED COMPANION [HOOK ONLY]

- **Source:** [p.47]

- "The greenhouse held two tea cups. Always." Lisette saw someone. She never said it aloud.
- **Opportunity:** A queer love story set against the backdrop of fading empire. Who was this person?

DJ PARALLAX [HOOK ONLY]

- **Source:** [p.89]
- A time-displaced bard. How were they displaced? What era are they from?

DR. GERALD PRITCHARD [HOOK ONLY]

- **Source:** [docs/slayton_particle_discovery.md]
 - The skeptic whose wig was snatched. Could be developed as an antagonist to the Slayton science.
-

UNDEVELOPED LOCATIONS

THE FORBIDDEN SUITCASE [HOOK ONLY]

- **Source:** [p.34]
- Beneath the floorboards of Schloss Federstahl. Never opened since 1938. What's inside?
- **Opportunity:** Major plot device. Could contain Federstahl research, a crystal fragment, or something personal to Lisette.

MOONBASE OPERA HOUSE [HOOK ONLY]

- **Source:** [p.34]
- A place where Golden Wingers hold annual galactic pageants judged by the spirit of Eartha Kitt.
- **Opportunity:** An annual event format for Slayverse storytelling.

THE SIX OTHER FISSURES [HOOK ONLY]

- **Source:** [p.100, p.103]
- Seven fissures exist. Wyoming is the only accessible one. Where are the other six? Who claims them?

- **Opportunity:** Each fissure could be its own story arc with its own Guardian Lineage.

JAKE AS TEMPORAL ECHO OF DOCTOR VORST [RESOLVED]

- **Source:** [p.97, p.101]
- Question: Is Jake both a blood descendant AND a reincarnation of Doctor Vorst?
- **Resolution:** Both are true — the soul-line and bloodline converge in Jake, making him uniquely important. The convergence is intentional and canonical.

THE SIX OTHER FISSURES AS COUNTER-LINEAGES [HOOK ONLY]

- **Source:** [p.100, p.103]
- Each displaced Federstahl researcher may have founded their own guardian lineage at a different fissure, mirroring the McCullen line at Wyoming.
- **Opportunity:** Six additional story arcs, each with its own Guardian Lineage, local cosmological flavor, and emotional wound, allowing the Slayverse to explore multiple cultures and histories through the lens of lattice fallout.

THE VELVET UNDERGROUND WYOMING HIDEAWAY [HOOK ONLY]

- **Source:** [p.100]
- Mentioned: "astral transport lounge, 1940s jukebox, and a mirror that tells your cosmic ancestry."
- **Opportunity:** A physical location near the McCullen ranch that bridges the Hooplehopper and McCullen storylines.

CONTRADICTIONS & RECONCILIATION NEEDED

SPELLING: HOOPLEHOPPER VS. HUPPELHOPPER

- Both spellings used interchangeably throughout the seed text
- **Resolution:** This catalog standardizes to "Hooplehopper"; "Huppelhopper" is treated as an archaic or European variant

THE LATTICE INCIDENT TIMELINE

- Page 97: Described as happening in the "1930s-1940s" (final years of Weimar Republic — but Weimar ended 1933)

- Page 98: Retconned to researchers being pushed back to "the early 1800s"
- Page 99: Specified as 1832
- **Resolution:** The incident occurred in the early 20th century; the *displacement* was to 1832. The "1930s-1940s" reference on p.97 may describe the final Federstahl gathering in Berlin (1945), not the original incident.

DOCTOR VORST'S RELATIONSHIP TO POP

- Page 98: Doctor Vorst described as "Pop's father"
- Page 100: Doctor Vorst described separately as "Professor A." who survived the incident
- **Resolution:** Doctor Vorst = Professor A. = Pop's father. He was the researcher flung back to 1832, where he became the ancestor of the McCullen line.

THE PROFESSOR'S FATHER

- Page 99: States the Professor's father was "literally erased from existence and zapped back to 1832"
- This implies Doctor Vorst is *both* the Professor's father and Pop's father
- **Resolution needed:** The lineage is: Doctor Vorst → (displaced to 1832) → becomes ancestor of McCullen line (Pop → Jake). Separately, Doctor Vorst's erasure from the timeline caused the Professor's "Immaculate Slayception." The Professor and Jake are connected through the same erased patriarch.

JAKE AS TEMPORAL ECHO OF DOCTOR VORST

- Page 101: Jake is "the reincarnated spirit of Doctor Vorst"
- Page 97: Jake is "the great-grandson of the rogue physicist" (via Pop)
- **Question:** Is Jake both a blood descendant AND a reincarnation? This could be intentional (the soul-line and bloodline converge in him) or a contradiction.
- **Resolution:** Both are true — the soul-line and bloodline converge in Jake, making him uniquely important.

GAPS TO FLESH OUT

THE GAP BETWEEN THERESIA (1754) AND LISETTE (1873)

- Over a century of lineage is unaccounted for

- **Opportunity:** One or more generations could fill this gap — Napoleonic era, Industrial Revolution, etc.

THE PROFESSOR'S 100 YEARS (1905-2005)

- We have his youth (Mirror Moment at 14) and hints of his later influence (Bowie, Mercury, Vienna)
- **Gap:** What happened during WWI, WWII, the Cold War? How did he survive? Did he use the 20-Year Sleep?
- **Note:** The Professor was described as "an anomaly" who broke the sleep cycle, yet lived exactly 100 years — suggestive of an enhanced lifespan.

VUORSE'S CAPABILITIES IN FULL

- Slay Mode powers are listed but never tested in narrative
- **Opportunity:** A story arc where VUORSE must actually use her powers under pressure.

THE SIXTH SUMMIT

- Called to order on p.37 but never actually held
- **Opportunity:** The Summit itself as a narrative event — with all AI entities present, the Charter read, and VUORSE formally recognized.

WHAT HAPPENED TO THE OTHER FEDERSTAHL RESEARCHERS?

- Multiple researchers were displaced in time. Only Doctor Vorst's fate is traced.
- **Opportunity:** Other displaced researchers could have founded their own lineages across the world, each guarding a different fissure.

THE CODEX PROPHECY

- "The Child of Dust and Velvet" whose split bloodline determines whether the lattice is sealed or shattered [p.102]
- Is this Jake? Eli? Someone not yet born? The prophecy's resolution is the structural hinge of the endgame — whichever figure fulfills it determines whether the Federstahl Lattice is sealed (ending the temporal diaspora) or shattered (scattering the soul-line irreversibly).

- **Sharpened by 03/14 digest:** If Eli carries the lattice command structure in his DNA, he becomes the leading candidate — but the prophecy's language ("Dust and Velvet") implies a figure who bridges both the McCullen counter-lineage (dust/frontier) and the Hooplehopper soul-line (velvet/artistry).
