

CANON LEDGER

Use this ledger to track canon confidence for writers room work. It does not replace the source files in canon/.

LOCKED CANON

- Wyoming Rift is the TV entry point.
- Jake McCullen's deeper lineage function is intentionally withheld from Season 1 writers room framing.
- Federstahl Lattice Incident is an ontological deletion event.
- VUORSE is the Season 1 framing narrator / cosmic voice.
- The Hooplehopper soul-line is not simple heredity.
- "Blood reproduces. The soul-line recurs."
- "The Hooplehoppers do not descend. They return."
- "Save the prairie mother, save the universe."

SEASON 1 FIREWALL

- Season 1's present-day Wyoming story should not have a defined external antagonist.
- Do not frame, name, imply, or reveal any hidden personal-cause logic behind the wound.
- Jake functions as the pseudo-antagonist through his denial, containment instinct, anger, and rejection of all things Slayverse.
- Let the Season 1 room feel the absence: the wounded land, Pop's silence, Jake's missing mother, and answers held just out of reach.
- The user is holding the Season 1 finale reveal; the room must not infer it.
- Vorst may appear only in his pre-finale depiction.

DEVELOPMENT CANON

- Add development-approved Season 1 interpretations here only after source review.
- Keep entries traceable to canon/ files or explicit user direction.
- Preserve source canon status labels exactly.

MYTHIC RUMOR / EXPLORATORY

- Add exploratory, rumor, or symbolic material here only when clearly labeled.
- Never treat exploratory material as locked canon.
- Flag contradictions and canon implications for canon-keeper review.
