

HOOPLEHOPPER BIOGRAPHY INVENTORY

This file is the inventory, not the biographies. One row per figure, no deep prose. Rows are ordered by canon tier: Tier 1 (public) figures first; Mythic-Rumor-and-Locked figures grouped together so their priority is visible to the eye; Tier 3 expansion-realm figures last; aggregate rows for unnamed cohorts at the foot.

The supreme source of truth above this file is Book One:
canon/1_words_of_weaver_book_one/Words_of_Weaver_BOOK_ONE.MD.

Companion documents:

- docs/writers-room/HUMAN_IN_THE_LOOP_QUICKSTART.md — names this inventory as the first synthesis target.
- docs/writers-room/narrative-philosophy-protocol.md — every biography draft beginneth with a ## Narrative Philosophy block.
- AGENTS.md — the seven training-layer access labels.

HEADER RULES

- **Do not invent full biographies in this file.** This file cataloguet what is known and what is missing; the biographies themselves are drafted in synthetic_enrichment/generated/ and pass through the Weaver's gate before they are spoken aloud.
- **Do not crown unknown future Hooplehoppers.** Placeholder rows for the veiled six and the 119-year extinction cohort remain marked unknown; the Weaver alone unsealeth.
- **Do not flatten Mythic Rumor into ordinary canon.** Rows whose canon_status is [MYTHIC_RUMOR_AND_LOCKED] may not be quoted as plain fact in pitches, scripts, decks, or public summaries.

- **This file is the first synthesis target named by the HIL Quickstart.** Begin every fresh synthesis session by re-reading it. Note which rows have moved. Note which rows are blocked on a Weaver ruling.

The Vorst row respecteth the finale firewall established in AGENTS.md and CLAUDE.md. Writers-room-facing work may know Vorst only through his pre-finale depiction; the inventory shall not infer, pitch, outline, or foreshadow his hidden causal function unless the user explicitly provideth finale scope.

NOTES ON USE

- Rows are added only by Weaver invocation. The minimum set above is the floor, not the ceiling.
- **current_biography_depth** cleaveth to a closed vocabulary: none, mention, sketch, partial, full. Drift in this column shouldeth be flagged to canon-keeper.
- **access_layer** is one of the seven training-layer access labels defined in AGENTS.md § **Training-layer access labels**.

- `vuorse_may_know_more` is `yes` / `no` / `unclear`. Where it is `yes`, the public-canon row holds the surface and the sealed layer holdeth what VUORSE knoweth in private.
 - `recommended_next_synthesis_action` is short, imperative, and honest about blocks: it nameth the Weaver ruling that gateth further work where one exists.
-

WHAT GOETH NEXT

For each row whose `recommended_next_synthesis_action` beginneth with *"draft Narrative Philosophy block before biography"*:

- 1 Open `docs/writers-room/narrative-philosophy-protocol.md` and fill the seven-field block for that figure.
- 2 Drop the draft into `synthetic_enrichment/generated/` with the philosophy block at the top and the Required Output Format beneath it (see `docs/writers-room/synthesis-process.md` § 10).
- 3 Submit to the Weaver per `docs/writers-room/HUMAN_IN_THE_LOOP_QUICKSTART.md` § 4.
- 4 Carry the resulting label per § 5 of the Quickstart.

No row shall move from `mention` or `sketch` to `full` without the Weaver's breath upon the draft.
