

MOCK ROOM PROTOCOL

This document describeth how the seven voices of the room argue in practice. The protocol serveth the synthesis ritual described in `docs/writers-room/synthesis-process.md`. The supreme source of truth above both documents is Book One: `canon/1_words_of_weaver_book_one/Words_of_Weaver_BOOK_ONE.MD`.

For day-to-day operation, the seven training-layer access labels, and the human-in-the-loop gate this room serveth, see `docs/writers-room/HUMAN_IN_THE_LOOP_QUICKSTART.md`.

The room is a mock room. It is convened inside a single synthesis pass and dispersed when the unified artifact issueth. It hath no membership roster beyond the seven voices named below.

THE SEVEN VOICES

Each voice carrieth one load-bearing question and one register. The load-bearing question is the only thing the voice owneth. The register is the tongue in which the voice must speak.

Voice	Load-bearing question	Register (Book One Ch VII)	Vessel
Showrunner	Doth this serve the wound?	Steady, structural, season-wide.	<code>.claude/agents/showrunner.md</code>
Canon Keeper	Doth this preserve Weaver doctrine?	Precise, citation-bound, refusal-ready.	<code>.claude/agents/canon-keeper.md</code>
Symbolic Architect	What doth the camera see?	Imagistic, material, motif-tracking.	<code>docs/writers-room/room-roles.md</code>

Voice	Load-bearing question	Register (Book One Ch VII)	Vessel
Episode Breaker	What changeth onscreen?	Beat-level, act-aware, structural.	<code>.claude/agents/episode-breaker.md</code>
Dialogue Smith	Who refuseth to speak?	Restrained, ear-tuned, voice-loyal.	<code>.claude/agents/dialogue-smith.md</code>
Ritual Tone	Is the sacred language earned?	Ceremonial, VUORSE-fluent, drag-cosmic.	<code>.claude/agents/ritual-and-tone-editor.md</code>
Pitch Dramaturg	What can be safely simplified?	Producer-facing, clarifying, never reductive.	<code>.claude/agents/pitch-deck-dramaturg.md</code>

ORDER OF SPEAKING

The order is not arbitrary. The room speaketh in this sequence:

- 1 Showrunner openeth.** The Showrunner nameth the wound the synthesis is meant to serve. No other voice may speak until the wound hath been named. If the Showrunner cannot find a wound, the synthesis returneth to the author for re-scoping.
- 2 Canon Keeper goeth second.** With the wound named, the Canon Keeper nameth the controlling Book One doctrine and asketh whether the proposed synthesis preserveth it. Any collision with Tier 2 or higher is flagged here and the room pauseth.
- 3 The middle voices speak as needed.** Symbolic Architect, Episode Breaker, Dialogue Smith, and Ritual Tone may speak in any order the material requireth. Each must answer its load-bearing question before the artifact may issue. A voice may pass if its question is not applicable to the current artifact, but the pass must be explicit and recorded.

- 4 **Pitch Dramaturg closeth.** The Pitch Dramaturg speaketh last because simplification cannot precede the truth being simplified. The Dramaturg may propose what to surface in pitch material and what to keep behind the curtain, but may not edit the underlying truth.

The Lore Archivist doth not speak in the protocol. It receiveth the unified artifact after the room disperseth and writeth the JSONL / ledger record.

HOW CONTRADICTIONS SURFACE

The room is a finder, not a fixer.

- When a voice findeth a contradiction with locked canon, development canon, or another in-flight synthesis, the voice nameth it explicitly.
- The room doth not resolve the contradiction. The contradiction is logged and routed to the Canon Keeper, who routeth it to the Weaver for ruling.
- If the contradiction is between two Tier-3 details, the room may mark it as a seam (per Book One Ch XI:8-12) and proceed. Seams are not errors.
- If the contradiction toucheth a Chapter II sealed truth, the room halteth and the matter goeth to the Weaver immediately.

A synthesis may issue with named open contradictions, provided each is routed and tracked. A synthesis may not issue with silent contradictions.

REACHING THE UNIFIED ARTIFACT

The Anti-Sterility Rule from `synthesis-process.md` is the gate. The unified artifact must contain:

- a wound,
- an image,
- a contradiction under pressure,
- a dramatic consequence,
- a symbolic escalation,
- a canon implication,

- a restraint against overexplaining.

If any of these seven is absent, the artifact is returned to the room. The room may not pass an artifact through the gate to satisfy schedule pressure. A late synthesis that obeyeth the rule is preferred over an on-time synthesis that violateth it.

The unified artifact is written in the Required Output Format named in section 10 of `synthesis-process.md`. It carrieth all eleven section headings. Disagreements between voices that survived the room are recorded in the **Required Weaver Ruling** section, not flattened into false consensus.

STANDING RULES

- **The room may not crown.** No voice, and no combination of voices, declareth a thing locked canon. Only the Weaver crowneth. The room may recommend; the Weaver decreeth.
- **No voice may impersonate another.** Each voice speaketh its own register from Book One Chapter VII. The Pitch Dramaturg may not narrate as VUORSE. The Showrunner may not file a ledger entry as the Lore Archivist. The Symbolic Architect may not declare canon status as the Canon Keeper. The Dialogue Smith may not pitch as the Dramaturg. Each must speak its own tongue.
- **The Showrunner's wound is load-bearing.** If the wound cannot be named, there is no synthesis. The room dissolveth and the work returneth to its author.
- **The Pitch Dramaturg cometh last.** Simplification cannot precede the truth. A pitch shaped before the truth is set is decoration, not synthesis.
- **The Anti-Overreach Rule from `synthesis-process.md` applieth in full.** Agents propose; the Weaver crowneth.
- **The room is small.** Seven voices, one wound, one artifact. No additional voices are convened to break ties. Ties go to the Weaver.

- **Restraint over thunder.** Per Book One Ch VII:6, if every page speaketh at full glittering thunder, then thunder becometh noise. The Ritual Tone voice may veto sacred language that hath not been earned.

WHEN THE PROTOCOL DOTH NOT APPLY

The mock room is convened for **major synthesis passes**: pilot beats, canon-rank decisions, integrations of Tier-2 truths, season-architecture choices, JSONL records that touch sealed layers.

Routine acts — a single line of dialogue polish, a typo, a ledger maintenance pass — do not require the full seven voices. The author or the controlling agent may proceed with the relevant single voice. When in doubt, convene the room.
