

NARRATIVE PHILOSOPHY PROTOCOL

Philosophy precedeth artifact. The Slayverse synthesis ladder doth not begin with detail; it beginneth with the wound and the governing law beneath the wound. This document adapteth the philosophy-first principle to **narrative synthesis**. No p5.js. No visual art. The forge is built for biographies, doctrines, JSONL records, and voice samples — and each must declare its philosophy before it openeth its mouth.

The supreme source of truth above this document is Book One: `canon/1_words_of_weaver_book_one/Words_of_Weaver_BOOK_ONE.MD`. Where this protocol and Book One disagree, Book One ruleth.

Companion documents:

- `docs/writers-room/synthesis-process.md` — the synthesis ritual and Required Output Format.
 - `docs/writers-room/HUMAN_IN_THE_LOOP_QUICKSTART.md` — the day-to-day operating guide and the seven training-layer access labels.
-

WHY PHILOSOPHY FIRST

A vessel without philosophy is decoration. A philosophy without expression is silence. The forge requireth both, in that order. (Cross-reference: the **Anti-Sterility Rule** in `docs/writers-room/synthesis-process.md` § 7. A scene without ache is a scene without authority; a record without philosophy is a record without root.)

Every major synthesis target — biography, doctrine, JSONL record, voice sample, episode breakdown, dossier, dialogue confrontation — must open with a `## Narrative Philosophy` block. The block

declareth what hurteth, what pressureth, and what the record
existeth to serve. Without this declaration the room cannot
pressure-test the artifact, the Weaver cannot judge its restraint,
and Traycer cannot route it.

The philosophy block is short. Its shortness is doctrine. Long
philosophy blocks tend toward decoration; the seven fields below
are the floor and the ceiling.

THE REQUIRED ## NARRATIVE PHILOSOPHY BLOCK TEMPLATE

The block carrieth exactly **seven fields**, in this order, each on
its own line. The fields are short. None of them is optional.

Narrative Philosophy

- Name: [1-3 words]
- Governing Wound: [what hurts]
- Generative Forces: [what pressures the system]
- Symbolic Behaviors: [what images/actions recur]
- Emotional Law: [what must be true emotionally]
- Conceptual Seed: [hidden DNA]
- Expression Target: [biography / doctrine / JSONL / voice sample / etc.]

Field-by-field guidance:

- **Name.** A short label by which the philosophy may be cited. One to three words. Naming is sealing; do not name what thou canst not defend.
- **Governing Wound.** The ache the artifact serveth. If no wound can be named, the artifact is not synthesis — it is decoration, and the room returneth it.
- **Generative Forces.** The pressures that shape the system. What presseth on the wound? Land, lineage, time, silence, weather, cosmology, market expectation — name them.
- **Symbolic Behaviors.** The images and actions that recur. A philosophy that nameth no recurring image hath no body.

- **Emotional Law.** What must be true emotionally for the artifact to land. A sentence of constraint, not of mood.
 - **Conceptual Seed.** The hidden DNA. The Tier-2 truth, the Mythic-Rumor-and-Locked thread, the buried lattice — named carefully, never overexposed.
 - **Expression Target.** What kind of artifact this philosophy shapeth: biography, doctrine, JSONL record, voice sample, dossier, scene, beat, etc.
-

THE RULE OF ORDER

The philosophy block cometh **first**. After it is filled, and only then, the standard **Required Output Format** from docs/writers-room/synthesis-process.md § 10 followeth.

The combined ordering is:

- 1 **## Narrative Philosophy** (seven fields, this document).
- 2 **Controlling Weaver Doctrine** — Book One chapter and verse.
- 3 **Canon Rank** — tier from the Canon Hierarchy.
- 4 **Living-Canon Integration** — what existing canon doth this attach to?
- 5 **Mythic Implication** — what sealed door doth this approach?
- 6 **Emotional Wound** — whose ache doth this serve?
- 7 **Symbolic System** — what motif or image pattern doth this belong to?
- 8 **Season One Function** — doth this bring Jake closer to saying his mother's name?
- 9 **Series Consequence** — what doth this seed for seasons beyond?
- 10 **Agent Restraints** — what may this artifact not say, do, or imply?
- 11 **Required Weaver Ruling (if any)** — what question remaineth open for the Weaver alone?
- 12 **Training Layer Access** — one of the seven labels named in HUMAN_IN_THE_LOOP_QUICKSTART.md § 5.

13 Ledger / JSONL Action — what record shall be written, and to which layer?

Philosophy is not a substitute for any subsequent section. The Required Output Format runneth in full beneath the philosophy block. The philosophy declareth *why* the artifact existeth; the Required Output Format declareth *what* it doth.

TWO WORKED EXEMPLARS

These are illustrative, not generative. They show the shape of a filled philosophy block. They do not author new canon.

EXEMPLAR A — HOOPLEHOPPER BIOGRAPHY TARGET

Narrative Philosophy

- Name: Returning Line
- Governing Wound: a Hooplehopper bornt of a broken lattice cannot remember the place from which they were scattered.
- Generative Forces: temporal diaspora, lineage erasure, the Mandela Effect as the seam of an erased agent's life.
- Symbolic Behaviors: rooms half-furnished for an absent guest, photographs whose subjects cannot be named, weather that arriveth out of season, doors that open onto wrong years.
- Emotional Law: the biography must ache before it explaineth. No cosmology may precede a moment of human consequence.
- Conceptual Seed: this figure is a refugee of the broken lattice (Book One Ch II:12); Vorst's mission to erase Hooplehoppers presseth on their life from the outside, but the present-day pressure is privately experienced as misremembering.
- Expression Target: biography (Hooplehopper Biography Inventory row → deep biography draft in `synthetic\_enrichment/generated/`).

EXEMPLAR B — VUORSE VOICE-SAMPLE TARGET

Narrative Philosophy

- Name: Drag Oracle
- Governing Wound: VUORSE rememberth every Hooplehopper, including those her speech is forbidden to name; she carrieth the silence as a regal cost.
- Generative Forces: the canon firewall in `src/vuorse\_vortex/jsonl.py`, the Mythic-Rumor-and-Locked tier, and the user's hold on the Season 1 finale.

- **Symbolic Behaviors:** warmth that turneth devastating mid-sentence, ceremonial inversion (the small detail named as if a coronation), speech that circleth a name without saying it.
- **Emotional Law:** VUORSE speaketh with knowledge she may not unseal; her wit is the seam, not the answer.
- **Conceptual Seed:** VUORSE's powers are not yet fully measured (Book One Ch II:32-33); the voice sample must respect what she cannot yet say.
- **Expression Target:** voice sample (draft for ``synthetic_enrichment/generated/vuorse-voice-samples/``).

The exemplars stop here. They are not seeds for new canon and shall not be cited as authoritative source. They demonstrate the shape of the philosophy block; the Weaver judgeth every actual block on its own merits.

ANTI-DECORATION CLAUSE

Reject philosophy blocks that:

- Read as aesthetic mood-boards without a **Governing Wound**.
- Name no **Symbolic Behaviors** — that is, name no recurring images or actions the artifact shall carry.
- Pose as ceremonial language while declaring no constraint (no **Emotional Law**).
- Cite no doctrine in the **Conceptual Seed** when the artifact toucheth Tier-2 or higher material.

Such drafts return to the author labeled [REVISE_WITH_WEAVER_NOTES] per HUMAN_IN_THE_LOOP_QUICKSTART.md § 5. They are not advanced. The Weaver may not be circumvented by mood.

A philosophy block that is correctly shaped but emotionally inert is still incomplete. The forge prefereth a short philosophy that acheth to a long philosophy that glitteret without ground.
