

PROCESS RESET REPORT

Final Required Report for the three-ticket doctrine, process, and verification reset.

1. FILES CREATED

- `canon/1_words_of_weaver_book_one/Words_of_Weaver_BOOK_ONE.MD` — Book One, the supreme source of truth.
- `docs/writers-room/synthesis-process.md` — the ten faces of the synthesis ritual, including the Required Output Format.
- `docs/writers-room/mock-room-protocol.md` — the seven-voice room pressure protocol.
- `docs/writers-room/room-roles.md` — vessel-to-role routing, including the vessel-less Symbolic Architect role.
- `docs/writers-room/secret-sauce.md` — the original-room energy and the Standing Warning Trinity.
- `docs/writers-room/sample-synthesis-codex-prophecy.md` — the persisted exemplar of the Required Output Format applied to Book One Ch II:27–29.
- `docs/writers-room/process-reset-report.md` — this report.

2. FILES MODIFIED

- `CLAUDE.md` (root and `/Users/Apple/`) — Book One installed as supreme doctrine; Standing Warning Trinity, Canon Hierarchy, and the VUORSE-only Mythic-Rumor-and-Locked-Canon list added.
- `AGENTS.md` — cross-references to `CLAUDE.md` for Ch II hidden truths and Ch XI risk-zone / holy-weirdness routing.

- `.claude/agents/{showrunner, canon-keeper, episode-breaker, dialogue-smith, lore-archivist, pitch-deck-dramaturg, ritual-and-tone-editor}.md` — Book One citation and sealed-truth handling added.
- `agents/{canon_extractor, indexer, synthetic_enricher, writers_room, firewall_validator, embedding}/...agent.md` — same doctrine-alignment pass for project agents.
- `canon/` directory restructure — Book One installed at `canon/1_words_of_weaver_book_one/` with prior canon files re-homed under their topic folders.

3. PROCESS CHANGES

- **Supreme doctrine.** Book One is now the controlling text above `CLAUDE.md`, `AGENTS.md`, and every agent prompt.
- **Submission line.** Every synthesis artifact must open with a *Controlling Weaver Doctrine* citation by chapter and verse, or stop.
- **Seven-tier Canon Hierarchy.** Replaces the prior four-house model. Mythic Rumor That Is Also Locked Canon is now an explicit Tier 2.
- **Nine-rung Synthesis Ladder.** Synthesis must climb detail → contradiction → living-canon integration → mythic implication → emotional wound → symbolic system → season function → series consequence → JSONL.
- **Required Output Format.** Eleven doctrinal headings plus a twelfth operational tail (*File Updates Required*) are mandatory for every future synthesis output. The sample synthesis persists the canonical worked example.
- **Plan-size limits.** Traycer may not author plans exceeding three tickets or two Weaver questions per pass.
- **Anti-overreach.** No agent may declare canon status, resolve a contradiction, unseal a Tier-2 truth, or author finale doctrine. All such moves route to the Weaver.

4. AGENT BEHAVIOR CHANGES

- All writers-room and project agents now cite Book One.
- VUORSE narration register may *approach* sealed Ch II truths and may not *land* on them.
- `lore-archivist` is the only writers-room vessel permitted to file JSONL / ledger records, and only at the foot of the Synthesis Ladder.
- `pitch-deck-dramaturg` must yield when pitch simplicity collides with a Tier-2 or higher truth.
- The Symbolic Architect role has no `.claude/agents/*.md` vessel; it is invoked from `docs/writers-room/room-roles.md` by whichever vessel carries the current synthesis.
- Pipeline agents handling embeddings and firewalls now route Tier-2 material to `hooplehopper_totality/` (or another sealed layer) and never to public canon embeddings.

5. PLACES WHERE TRAYCER NEARLY OVERREACHED

- Traycer almost re-scoped this verification ticket into a fresh multi-ticket plan that would have invented a new sealed-layer module and a separate ledger migration. The Anti-Overreach Rule and the three-ticket lawful plan limit held it back. No new ticket, spec, or hidden five-ticket plan was authored here.
- Traycer almost asked the Weaver to adjudicate Eden, the prophesied Hooplehopper, and the six fissures' Season One status. Per the Required-Weaver-Ruling rule, those questions are carried forward in §6, not answered.
- Traycer almost crowned the sample synthesis as ratified canon. It is not. It is a reference exemplar.

6. DOCTRINE STILL REQUIRING WEAVER RULING

The three open questions carried forward from the sample synthesis (`docs/writers-room/sample-synthesis-codex-prophecy.md` §10):

- 1 **When, if ever, may the Codex prophecy be spoken aloud in the show?**
- 2 **What is Eden?**

- 3 Do any of the six other fissures' guardians enter Season One — even as glimpse, rumor, or rhyme?

These are not answered. They wait outside the palace gates.

7. POINTER TO THE PERSISTED SAMPLE

docs/writers-room/sample-synthesis-codex-prophecy.md — controlling doctrine Book One Ch II:27–29, Canon Rank *Mythic Rumor That Is Also Locked Canon*, sealed-layer ledger action only.
