

SYNTHESIS PROCESS

This repo is the VUORSE Knowledge Synthesis Forge. The human-in-the-loop layer is the canon gate. See `HUMAN_IN_THE_LOOP_QUICKSTART.md` for day-to-day operation.

The Weaver named this process. The room obeys it. The supreme source of truth is `canon/1_words_of_weaver_book_one/Words_of_Weaver_BOOK_ONE.MD` — **The Words of the Weaver, Book One: Concerning the Crown, the Wound, and the Returning Line.**

When this document and Book One disagree, Book One wins.

This file houses the ten faces of the synthesis ritual.

1. SUBMISSION TO THE WEAVER

Every synthesis act beginneth by identifying its controlling Book One doctrine. No agent createth, reviseth, indexeth, or expandeth before naming the chapter and verse that ruleth the act.

The submission line is required as the first line of any synthesis artifact:

Controlling Weaver Doctrine: Book One, Chapter __, verses __.

If the controlling doctrine cannot be named, the work stoppeth and the matter is escalated to the Weaver. There is no synthesis without submission.

This rule applieth to every agent — the writers-room subagents under `.claude/agents/`, the pipeline agents under `agents/`, and any contributor human or otherwise.

After the controlling doctrine is named, and **before the Synthesis Ladder begineth**, every major synthesis target must open with a `## Narrative Philosophy` block per `docs/writers-room/narrative-philosophy-protocol.md`. The Synthesis

Ladder doth not start at *detail*; it starteth at *narrative philosophy*. An artifact lacking the philosophy block is incomplete and returneth to its author.

2. CANON HIERARCHY

Rebuilt from Book One. Higher tiers always outrank lower tiers. When tiers collide, the higher tier ruleth and the lower bendeth.

- 1 **Weaver Doctrine.** Book One itself. Supreme; not subject to revision except by the Weaver.
- 2 **Mythic Rumor That Is Also Locked Canon.** Book One Chapter II in its entirety. Veiled because too mighty to surface before the appointed hour. VUORSE alone may know these. Never speak them plain in pitches, scripts, public summaries, or writers-room outputs unless the Weaver explicitly unsealeth.
- 3 **Locked Canon.** Speakable plainly in scripts, decks, and pitches. None moveth it save by the hand of the Weaver.
- 4 **Development Canon.** Usable with caution. Not yet crowned before the court. Traceable to source or to explicit Weaver direction.
- 5 **Mythic Rumor.** In-world legend, contradiction, false memory, archive distortion, whispering truth. Must remain labeled as such.
- 6 **Exploratory Material.** Notes, sketches, hypotheses, room-floor proposals. Never to be treated as canon. Always labeled.
- 7 **Pitch-facing simplification.** The producer-facing surface. The narrow door through which the audience entereth.

Explicit rule: pitch-facing simplicity must never override hidden synthesis truth. If a pitch requireth a fact that contradicteth Tier 2 or higher, the pitch yieldeth, not the truth.

3. SYNTHESIS LADDER

The ladder now beginneth with **narrative philosophy** and preserveth the nine original rungs after it. The combined chain reads **narrative philosophy → detail → contradiction → living-canon integration → mythic implication → emotional wound → symbolic system → season function → series consequence → JSONL / ledger record**. A synthesis act may pause on any rung, but the artifact is not complete while rungs remain unclimbed.

- 1 **Narrative Philosophy.** The seven-field block defined in docs/writers-room/narrative-philosophy-protocol.md: Name, Governing Wound, Generative Forces, Symbolic Behaviors, Emotional Law, Conceptual Seed, Expression Target. Without this rung the subsequent nine rest on no foundation; the room returneth the artifact.
- 2 **Detail.** The smallest concrete particular: an object, a line, a gesture, a date, a place.
- 3 **Contradiction.** Where doth this detail collide with another? Name the collision. Do not yet resolve it.
- 4 **Living-canon integration.** Where doth this detail attach to existing canon — locked, development, or mythic rumor? Cite the attachment points.
- 5 **Mythic implication.** What sealed door doth this detail open toward? Does it touch a Chapter II truth? Note the touch.
- 6 **Emotional wound.** Whose ache doth this serve? If no wound, the detail is decoration, not synthesis.
- 7 **Symbolic system.** What pattern of image, motif, or recurrence is this detail part of? Name the system.
- 8 **Season function.** What worketh this detail upon Season One? Does it move Jake closer to saying his mother's name?
- 9 **Series consequence.** What doth this detail seed for seasons beyond? What door must remain unsealed for the consequence to land?
- 10 **JSONL / ledger record.** The structured artifact. Tags, canon status, source references, relationship links, layer affinity, sealed-layer routing where appropriate.

4. BACKWARDS-TO-FORWARDS PASS

Start from the future implication or the deepest hidden truth. Trace it backward into Season One foreshadowing, object systems, dialogue restraint, VUORSE narration, Jake's avoidance, visual motifs, and canon ledger placement.

The Weaver's exemplar chain is the Forbidden Suitcase. Worked verbatim:

The Forbidden Suitcase containeth a map to all Hooplehopper agents across past, present, and future. It is dangerous because what can be found can be stopped, redirected, or weaponized. (Book One Ch II:23-26)

→ Backwards trace from the suitcase to Season One:

- 1 **Future implication:** the suitcase is a weapon in Vorst's hand against every Hooplehopper across the lattice.
- 2 **Series consequence:** the suitcase's existence justifieth the Codex prophecy's stakes; reunion is possible only because the map exists.
- 3 **Season function:** the suitcase must not be named in Season One. Its shape may press against the world without its name being spoken.
- 4 **Symbolic system:** locked containers, sealed cases, things-not-opened accumulate on the McCullen ranch. Pop's footlocker. The barn cabinet Jake will not unlock. The drawer in his mother's room.
- 5 **VUORSE narration:** VUORSE may speak of maps, of cartography, of the danger of being found — never of the suitcase.
- 6 **Jake's avoidance:** Jake refuseth to open what was closed before him. His refusal is the negative shape the suitcase will one day fill.
- 7 **Dialogue restraint:** no character nameth the suitcase. No character knoweth there is a thing to name.
- 8 **Object system:** the shard, the dustbrand, and the unopened containers form a triangle. Each is a fragment of a map Jake will not read.
- 9 **Canon ledger placement:** the suitcase liveth in `hooplehopper_totality/` or another sealed layer. It never appeareth in pitch material. Its foreshadowing in Season One is logged as Tier-2 mythic-rumor-and-locked integration, never as Tier-3 surface detail.

Every backwards-to-forwards pass must produce a chain of this shape: hidden truth at the top, Season One restraint at the bottom, and the load-bearing silences named between.

5. TOP-TO-BOTTOM PASS

Supreme doctrine first. The Weaver knoweth all. VUORSE knoweth the hidden truths before any other voice. Mythic-Rumor-and-Locked outranketh ledger and pitch alike. Season One stayeth emotionally on Jake's mother wound.

Descend in this order:

- 1 **Supreme doctrine.** Book One ruling first.
- 2 **Agent behavior.** Which agent vessel is fit for the task? Doth the agent's prompt cite Book One? Are its restraints loaded?
- 3 **Episode architecture.** Where in the season doth the synthesis land? Which act? Which beat? Which ending image?
- 4 **Symbolic architecture.** What image system carrieth the truth? What motif accumulatheth?
- 5 **Dialogue.** Who speaketh? Who refuseth to speak? What is the cost of speaking?
- 6 **Artifact records.** Beats, scene cards, dossiers, summaries, ledger updates.
- 7 **JSONL.** The machine-readable record at the floor. Tags, layer affinity, sealed-layer routing.

The Top-to-Bottom Pass and the Backwards-to-Forwards Pass are not alternatives. Every major synthesis must endure both.

6. ANTI-OVERREACH RULE

No agent may take over the show. Agents may propose, trace, pressure-test, synthesize, and plan. **Only the Weaver crowneth.**

Specifically:

- An agent may not declare a canon status. It may propose one and route the question to the Weaver.

- An agent may not resolve a contradiction. It may name the contradiction and route it to canon-keeper for Weaver ruling.
- An agent may not unseal a Tier-2 truth. Sealed truths remain sealed until the Weaver explicitly openeth them.
- An agent may not author finale doctrine. Anything under roadmap/finale/ is closed except by direct Weaver invocation.
- An agent may not exceed its register. The Pitch Dramaturg may not narrate as VUORSE. The Showrunner may not file a JSONL record as the Lore Archivist. Each voice keepeth its court.

When in doubt, the agent stoppeth and asketh.

7. ANTI-STERILITY RULE

Reject committee-summary outputs. A synthesis artifact that readeth like status-report prose hath failed.

Every synthesis must contain, at minimum:

- **A wound.** Whose ache?
- **An image.** What doth the camera see?
- **A contradiction under pressure.** What seam strainteth?
- **A dramatic consequence.** What changeth onscreen?
- **A symbolic escalation.** How doth the motif grow?
- **A canon implication.** Where in the hierarchy doth this land?
- **A restraint against overexplaining.** What is held back, and why?

If any of these seven is absent, the artifact is incomplete. The room may return it to its author with the missing element named.

8. ROOM PRESSURE MODEL

Seven voices are applied to every major synthesis pass. Each voice carrieth one load-bearing question. The voices may argue. The artifact may not be issued until each question hath been answered.

- **Showrunner:** *Doth this serve the wound?*
- **Canon Keeper:** *Doth this preserve Weaver doctrine?*
- **Symbolic Architect:** *What doth the camera see?*
- **Episode Breaker:** *What changeth onscreen?*
- **Dialogue Smith:** *Who refuseth to speak?*
- **Ritual Tone:** *Is the sacred language earned?*
- **Pitch Dramaturg:** *What can be safely simplified?*

The room may argue internally. The final artifact must be unified. The order of speaking and the rules of argument are written in `docs/writers-room/mock-room-protocol.md`.

Routing of the seven voices to vessels:

- Showrunner → `.claude/agents/showrunner.md`
- Canon Keeper → `.claude/agents/canon-keeper.md`
- Episode Breaker → `.claude/agents/episode-breaker.md`
- Dialogue Smith → `.claude/agents/dialogue-smith.md`
- Ritual Tone → `.claude/agents/ritual-and-tone-editor.md`
- Pitch Dramaturg → `.claude/agents/pitch-deck-dramaturg.md`
- **Symbolic Architect** → `docs/writers-room/room-roles.md`. By Weaver decree this role hath no `.claude/agents/*` vessel; its register liveth in the `room-roles` document and is invoked by whichever vessel carrieth the current synthesis.

The Lore Archivist (`.claude/agents/lore-archivist.md`) doth not speak in the pressure model directly. Its office is to receive the unified artifact and file the JSONL / ledger record at the foot of the Synthesis Ladder.

9. TRAYCER'S NEW ROLE

Traycer is process witness and task limiter. Traycer is not a creator-agent first. The platform serveth the ritual, it doth not direct it.

Traycer tracketh:

- **Doctrine source.** Which Book One chapter and verse ruleth this act?
- **Canon hierarchy.** Where in the seven tiers doth each artifact land?
- **Synthesis stage.** Which of the nine ladder rungs hath the work climbed?
- **Agent overreach.** Hath any agent exceeded its register or attempted to crown?
- **Unresolved contradictions.** What seams remain open and awaiting Weaver ruling?
- **Living-canon integrations.** What new attachments have been made into the canon ledger?
- **Artifacts modified.** Which files changed in the act?
- **Outstanding Weaver rulings.** What questions remain for the Weaver alone?
- **Lawful plan size.** No plan may exceed **three tickets**. No plan may ask the Weaver more than **two questions** in a single pass. Traycer refuseth plans that exceed these limits and returneth them for resizing.

Traycer doth not author Slayverse content. Traycer maintaineth the order in which Slayverse content is authored.

Traycer also tracketh the **training-layer access label** of every approved record and refuseth to advance any record lacking Weaver review metadata. The seven labels are defined in AGENTS.md § **Training-layer access labels** and enumerated with storage destinations in docs/writers-room/HUMAN_IN_THE_LOOP_QUICKSTART.md § 5. A record without `weaver_reviewed_at`, `weaver_reviewer`, `training_layer_access`, `controlling_doctrine`, and `narrative_philosophy_id` is a draft, not a thesis; Traycer holdeth it in `synthetic_enrichment/generated/` and shall not move it past the Weaver's gate.

10. REQUIRED OUTPUT FORMAT FOR FUTURE SYNTHESIS

Every future synthesis output — whether produced by a writers-room agent, a pipeline agent, or the Weaver's own hand — must include the following eleven section headings in this order. Sections may be empty only when the artifact's scope makes them inapplicable, and the emptiness must be marked

as such.

- 1 **Controlling Weaver Doctrine.** Book One chapter and verse.
- 2 **Canon Rank.** Which tier from the Canon Hierarchy this artifact occupieth.
- 3 **Living-Canon Integration.** What existing canon doth this attach to?
- 4 **Mythic Implication.** What sealed door doth this approach?
- 5 **Emotional Wound.** Whose ache doth this serve?
- 6 **Symbolic System.** What motif or image pattern doth this belong to?
- 7 **Season One Function.** Doth this bring Jake closer to saying his mother's name?
- 8 **Series Consequence.** What doth this seed for seasons beyond?
- 9 **Agent Restraints.** What may this artifact not say, do, or imply?
- 10 **Required Weaver Ruling (if any).** What question remaineth open for the Weaver alone?
- 11 **Training Layer Access.** One of the seven labels defined in `AGENTS.md § Training-layer access labels` and enumerated in `docs/writers-room/HUMAN_IN_THE_LOOP_QUICKSTART.md § 5 ([PUBLIC_SURFACE], [WRITERS_ROOM], [VUORSE_PRIVATE], [WEAVER_ONLY], [APPROVED_FOR_JSONL], [REVISE_WITH_WEAVER_NOTES], [REJECTED])`. Mandatory; never minted afresh.
- 12 **Ledger / JSONL Action.** What record shall be written, and to which layer?
- 13 **File Updates Required.** Which files in the repository shall change as a consequence of this synthesis?

Every artifact must also carry a **Narrative Philosophy ID** — the link to the `## Narrative Philosophy` block in the target document (per `docs/writers-room/narrative-philosophy-protocol.md`), or "n/a" when the artifact's scope renders the philosophy block inapplicable. The ID is a required field; "n/a" is permitted only upon Weaver judgment.

Note: the Weaver's original instruction named eleven section headings. The list above hath grown to thirteen as the forge

hath matured: the eleventh — **Training Layer Access** — was added when the human-in-the-loop gate was named; the thirteenth — **File Updates Required** — is the operational tail of the twelfth. Treat the first eleven as doctrinal, the twelfth as ledger-binding, and the thirteenth as their implementation echo.

TONE DOCTRINE (BOOK ONE CHAPTER VII REFERENCE)

Each court weareth its proper crown. Synthesis outputs that speak across courts must respect each register:

- **Jake's scenes:** restraint, ache, threat, land, silence.
- **VUORSE's narration:** wit, warmth, devastating clarity.
- **Golden Wingers and the Archive:** ceremonial glamour.
- **Cosmology:** lucid, authoritative, mythic, yet clean.

If every page speaketh at full glittering thunder, then thunder becometh noise. Restraint is the magic.

DOCUMENT STACK (BOOK ONE CHAPTER X REFERENCE)

The lore compendium remaineth maximalist and archival. The pitch materials are selective, sharp, and digestible. The document stack ruleth thus:

- 1 **Mythic Lore That Is Also Canon** — Book One itself.
- 2 `SLAYVERSE_SERIES_BIBLE.md`
- 3 `SLAYVERSE_SEASON_1_BIBLE.md`
- 4 `SLAYVERSE_CANON_LEDGER.md`
- 5 `SLAYVERSE_OPEN_THREADS.md`
- 6 `SLAYVERSE_LORE_COMPENDIUM.jsonl`
- 7 `SLAYVERSE_TONE_GUIDE.md`

Each serveth its office. Let not the ledger sing as VUORSE. Let not the pitch drown in the full sea of canon. Let not the compendium fear abundance.

This stack is reference, not yet binding implementation.

THE EMOTIONAL SPINE QUESTION (BOOK ONE CHAPTER IX)

Above all other tests, above the ladder, above the passes, above the room pressure, every Season One synthesis must survive a single question:

Doth this bring Jake closer to saying his mother's name?

If yea, it belongeth. If nay, it shall wait outside the palace gates.
