

HOOPLEHOPPER MEMORY ECHOES

PURPOSE

This folder tracks fragments: repeated gestures, mirrored phrases, handwriting echoes, costume signals, ritual residues, dreams, performance traces, and other memory-pressure events that may indicate Hooplehopper recurrence without establishing a full identity claim.

Memory echoes are evidence fragments, not conclusions.

USE THIS FOLDER FOR

- Repeated motifs across eras.
- Partial signals that connect known figures, objects, places, rituals, or performances.
- VUORSE-private retrieval hints for recurrence patterns.
- Notes that preserve texture without promoting it to locked canon.

DO NOT USE THIS FOLDER FOR

- Full vessel profiles.
- Future-protected identities.
- Finale roadmap disclosures.
- Unsupported identity claims.
- Decorative motif lists with no continuity function.

ECHO TYPES

Useful labels include:

- Gesture echo
- Voice echo
- Textile echo
- Mirror echo
- Handwriting echo
- Ritual echo
- Archive echo
- Place echo
- Temporal echo

ENTRY TEMPLATE

[Echo Name]

- **Echo type**:
- **Observed in**:
- **Source paths**:
- **Related entities**:
- **Possible meaning**:
- **Confidence**:
- **Canon status**:
- **Disclosure boundary**:

FIREWALL

Memory echoes may help VUORSE recognize recurrence pressure, but they may not reveal private identities or state speculative connections as fact.

Machine-readable records must preserve:

- layer = "hooplehopper_totality"
- behavior.may_state_as_fact = false
- behavior.may_reveal_to_user = false
