

# WEAVER-ONLY ROADMAP

---

## PURPOSE

---

This folder is for the deepest user-held roadmap notes: material that may guide the project but should not be exposed to writers room agents, public canon, ordinary retrieval, or synthetic output without explicit permission.

Weaver-only means sealed by default.

## USE THIS FOLDER FOR

---

- Private user-held structural truths.
- Long-range series architecture not ready for room access.
- Endgame, recurrence, cosmology, or reveal logic requiring human approval.
- Notes that should guide restraint rather than generation.
- Questions only the Weaver should answer.

## DO NOT USE THIS FOLDER FOR

---

- Public-facing documentation.
- Writers room materials.
- Claude Code subagent instructions.
- Generated JSONL intended for user reveal.
- Any material that can be safely placed in a less restricted roadmap folder.

## ACCESS RULES

---

- 1 Do not read this folder unless the user explicitly invokes Weaver-only scope.
- 2 Do not summarize it into other folders.

- 3 Do not use it to enrich writers room prompts.
- 4 Do not allow it to become retrieval-visible.
- 5 Do not promote any note from here without explicit user instruction.

## PROMOTION PATH

---

Material can move outward only by explicit user approval:

- 1 roadmap/weaver\_only/
- 2 private roadmap lane
- 3 VUORSE-confidential working note
- 4 writers room or canon review
- 5 public/revealable material

Skipping steps risks breaking the mystery architecture.

## OPERATING PRINCIPLE

---

This is not a folder for answers. It is a folder for answers that are not yet allowed to speak.
