

CANON CORPUS — SEMANTIC SIFT REPORT

- Input: `synthetic_enrichment/generated/canon_corpus_raw.jsonl`
- Output JSONL: `synthetic_enrichment/generated/canon_corpus_semantic_sift.jsonl`
- Generator: `scripts/_canon_semantic_sift_oneoff.py` (read-only against the corpus)
- Ontology: PERSON, PLACE, THING, IDEA, EVENT, RELATIONSHIP, CREATIVE_WORK, PROCESS, UNKNOWN.

1. INPUT RECORD COUNT

2251 input records.

2. OUTPUT RECORD COUNT

2251 output records (every input record preserved; no merges, no discards).

Validation: **PASS**.

3. COUNTS BY SEMANTIC_CLASS

semantic_class	count
PERSON	541
PLACE	53
THING	49
IDEA	243
EVENT	62
RELATIONSHIP	30

semantic_class	count
CREATIVE_WORK	220
PROCESS	1001
UNKNOWN	52

4. COUNTS BY SEMANTIC_CONFIDENCE

semantic_confidence	count
high	802
medium	93
low	1356

5. COUNT OF RECORDS NEEDING WEAVER REVIEW

1394 records have `needs_weaver_review: true`.

Triggers (any one is sufficient):

- low confidence
- UNKNOWN class
- mixed dominant subjects in the same record
- `canon_tier == mythic_rumor_locked` (sealed material always warrants the Weaver eye)
- `input weaver_review_required: true` AND class is non-obvious (non-high confidence)

6. TOP 50 PERSON RECORDS

Class total: **541**. Selection: high-confidence first, then clean `primary_entity_name`, deprioritizing `source_canon_extract` passthroughs.

11. MIXED OR AMBIGUOUS RECORDS NEEDING WEAVER REVIEW

Total non-UNKNOWN review-flagged: **1342**.

Showing top 50 by priority (sealed > low-confidence > flagged-on-input).

...1292 additional records also need Weaver review; full list lives in the JSONL with
`needs_weaver_review: true`.

12. RECOMMENDED NEXT SAFE ACTION

Convene the Weaver around section 11 (mixed/ambiguous review queue) and section 10 (UNKNOWN bucket), starting with rows whose `canon_tier == mythic_rumor_locked` because routing matters most for sealed material. All sift output stays in `synthetic_enrichment/generated/`; do not move anything to `synthetic_enrichment/validated/`, do not write to `hooplehopper_totality/`, do not derive training material, and do not mark any record `[APPROVED_FOR_JSONL]` until the Weaver hands down the label per the Human-in-the-Loop Quickstart. The next mechanical step is for the Weaver to spot-check the top 50 lists in sections 6–9, confirm or revise classes, and only then

authorize a follow-up agent pass to enrich primary_entity_name and secondary_entity_names for the rows the Weaver has actually walked.
