

YOU SHALL NOT PASS — CHARACTER DRIFT

The Gray Eye holds this bridge.

Status of all images: design — never auto-canon.

Rule	Meaning
No lock, no generate	genmedia may not mint a new plate for a character without a designated design-lock path (or explicit gap-first-plate brief)
One face per id	Each character id has at most one active design-lock; other files are variant / rejected / orphan — never competing truths
Refs or refuse	Consistency runs must genmedia upload the lock and pass it as reference; prompt-only regen of a known face is forbidden
Style forks are costumes, not new souls	Pitch-deck Almodóvar / Waters / Romero / Tarantino sets are style variants of the same design lineage, not alternate canons
Favorites feed mood, not faces	Steward favorites inform atmosphere; they do not silently rewrite character locks
Design ≠ canon	Even a perfect lock stays design until the steward says promote
Orphans get named or quarantined	Untitled residents = map failure until linked or listed in orphan[]

Any genmedia step that violates this gate is a failed step. Redo. Do not shrug.

— Gandalf the Gray Eye

ADDENDUM — LORA TEST DUMPS

Slayverse/assets/lora_training/ (including sassy_1024) is **out of bounds** for design-locks and genmedia refs unless the steward explicitly promotes a specific file. Messy training tests stay outside the key-art path.
