

GRAY EYE FORGE — KEY-ART-CENSUS

Counsel of Gandalf the Gray Eye

SETUP

- **Change point:** Impose structure on Slayverse character visual identity; throw You Shall Not Pass on character drift; prepare genmedia path without treating existing art as canon.
- **Cutoff:** 2026-08-05 — lore indexes + VUORSE-VORTEX / slay-cortex design libraries as observed in Wave 0 recon.
- **Interval:** Present → structure + near-lock stabilize (prospective).
- **Mode:** prospective
- **Domains:** Character roster, design image caches, pitch-deck visual forks, Velvet/Archive mood, genmedia consistency pipeline.
- **Workspace:** C:\runb2\VUORSE-VORTEX\worldforge\key-art-census\

DECLARED ASSUMPTIONS

- 1 All current images are **artistic design only**, not canon looks (steward).
- 2 Near-lock design candidates: **Professor Von Hooplehopper** (incl. Heda Von Schwann dual look) and **Dr. Mariah Slayton** (steward).
- 3 Favorite design plates (mood, not locks): the velvet balance.png, thweavergold.jpg, swan lake.png (steward).
- 4 Elena_Slayton_* press kits map to Dr. Mariah Slayton until steward corrects (assumption).
- 5 Heda Von Schwann is the Professor's drag alter ego in design; not yet in lore index (assumption → promotion candidate).
- 6 Large caches (slay-cortex/your_project, data) counted in Wave 0; not plate-by-plate mapped (assumption — follow-up).

EXCLUDES

.venv, node_modules, __pycache__, .pytest_cache, .ruff_cache, .git
