

WAVE 0 — COMPLETE RECONNOITER

Gray Eye forge: key-art-census · 2026-08-05

Prior planning chat was a foyer tour. This document is the signed checklist.

CHECKLIST

#	Root	Exists	Images	MD	JSON	Other media	Role

Machine detail: [media-roots.json](#), [lore-roots.json](#).

CHARACTER INDEXES COMPARED (CANON COUNTS)

Index	Character total
D:\runb\slay-cortex\docs\lore\slayverse_index.json	26
C:\runb2\VUORSE-VORTEX\Slayverse\json\slayverse_index.json	26
.../slayverse_index_orginal.json	26
.../slayverse_index_minified.json	26
.../slayverse_lore_index_1point2.json	parse failed / nonstandard shape — follow-up

See [character-index-compare.json](#).

Roster: 26 indexed characters. Plus 4 Summit AI in characters.md (not in JSON). Cici the Cat index id = pscopy-pscat (intentional PScopy-PScat mascot naming).

PRIMARY DESIGN MAP (WAVE 1 SEED)

Mapped **141** plates under Slayverse/images + pitch-deck images → [image-map.json](#).

- Linked / claimed: ~133
- Orphans (hash / unnamed): 8 — still need eyes
- Characters with ≥ 1 primary design plate: 11
- **Design gaps (15):** Conrad, Adelram, Benedict, Lysander, Theresia, Yssenda, Sigismund, Isolde, Ludolf, Doctor Vorst, Eli, Miss Slaytonia Verse, Wylus, Cici (pscopy-pscat), Mistress Euphoria Blaze

Near-lock design counts: Professor ~21+ plates; Dr. Mariah / Elena press kits = 2.

Not fully mapped (honest): Slayverse/assets (120 images), your_project (3879), data (1403). Counted. Not plate-labeled. That is Wave 0 done, not Wave ∞ .

WHAT THE FOYER TOUR MISSED (INFERENCE)

- Entire VUORSE-VORTEX tree as primary territory
- Pitch-deck style forks under rift/slayverse-pitch-deck/images
- Slayverse/assets media
- canon/, velvet_archive/, hooplehopper_totality/, prior worldforge/runs
- Multi-thousand image caches under slay-cortex/your_project and data

HONESTY SEAL

Wave 0 checklist rows above are filled. Large caches are inventoried by count, not by face. Orphans and gaps remain listed — that is structure, not failure.

— Gandalf the Gray Eye

ADDENDUM — SASSY MCGRAW (STEWARD 2026-08-05)

- **First public appearance** character (steward).
- Docs present: `sassafras_a_mcgraw_ultimate_origin.json`, `sassafrass_a_mcgraw_texas_hopper_tall_tale.json`.

- **Not** in the 26-id slayverse_index.json yet — promotion candidate when steward asks.
- Imagery: **steward will personally select/add clean plates**. Gray Eye must **not** treat Slayverse/assets/lora_training/sassy_1024/ (LoRA test mess) as design-lock pool.
- Packet: briefs/sassy-mcgraw.md.
