

GRAY EYE FORGE — PARALLAX-BARD-B2-2026-08-04 — META

Counsel of Gandalf the Gray Eye

SETUP

- **Change point:** Answer the open thread on DJ Parallax — *How were they displaced? What era are they from?* (canon question in `canon/open_threads/open_threads.md`; answers in this run are simulation / assumption, not promoted canon)
- **Cutoff:** Settled hook-state before this sim: Parallax exists only as a named Club Cosmic DJ — "time-displaced bard in a holographic corset," source [p.89], status [HOOK ONLY]
- **Interval:** Origin era → Lattice/diaspora displacement event → arrival and function at Club Cosmic (timeless register); light forward glance at what their choice does to the cabaret's stitch
- **Mode:** hybrid (past displacement → present Club Cosmic consequences)
- **Domains:** temporal diaspora, Federstahl Lattice fallout, Club Cosmic / shard-waveform terminal, soul-line-as-art, Tier 3 expansion realm, performance-as-resistance
- **Declared assumptions:** Primary origin era = late Weimar Berlin cabaret culture (c. 1929–1932), not yet named in canon
- Displacement mechanism = bardic/sung frequency accidental coupling to a Federstahl chronogenic side-channel, then snag on Club Cosmic's underfloor shard terminal (missed Earth-fissure landing)
- "Holographic corset" is Club Cosmic's local translation of their period stage costume, not Earth tech they brought
- This run does not touch Season 1 Wyoming or sealed Ch II bodies
- Prior baseline: `worldforge/recon-2026-08-03/`

SCOPE GATES

- Simulation is not canon until the Weaver promotes it.
- Path-cite sealed borders only; do not open `hooplehopper_totality/` or `roadmap/finale/`.
- Do not edit `canon/` files.
