

GRAY EYE FORGE — RECON-2026-08-03

Counsel of Gandalf the Gray Eye

SETUP

- **Change point:** none — baseline survey of the land as it stands (assumption: "reconnoiter" means present-tense map, not a what-if)
- **Cutoff:** 2026-08-03 — settled holdings visible in the repo without opening sealed-layer bodies
- **Interval:** present snapshot only
- **Mode:** prospective
- **Domains / geographies:** forge tooling, canon hierarchy, Season 1 wound, places/institutions/forces, sealed borders, open threads, asset forges
- **Declared assumptions:** worldforge/ was absent at cutoff and is created by this seal; Ch II / finale / totality bodies stay path-cited only

BASELINE (CANON ANCHORS)

Two natures share one crown (canon + inference):

- 1 **VUORSE Knowledge Synthesis Forge** — human-gated workshop; Weaver breath alone crowns vessels (AGENTS.md, HITL quickstart).
- 2 **Private Slayverse singularity system** — GPU-first Python architecture beyond ordinary RAG (README.md).

Supreme doctrine:
canon/1_words_of_weaver_book_one/Words_of_Weaver_BOOK_ONE.MD.

Load-bearing paths: TV bible under canon/TV_Series_Bible/; S1 spine at docs/writers-room/season-1-spine.md; domain corpus under canon/{characters, places, cosmology, organizations, artifacts, rituals, relationships, timeline, open_threads}/; firewall in

src/vuorse_vortex/settings.py + firewall.py; raw assets in Slayverse/.

Canon houses (Book One Ch I): Locked / Development / Mythic Rumor / Mythic Rumor that is also Locked Canon. Revelation tiers (Ch VI): Tier 1 now → Tier 2 support → Tier 3 expansion.

CAUSAL MAP

NODES

See nodes.json. Primary cluster: Jake, Wyoming Rift, mother wound, Weaver, VUORSE, Federstahl Lattice, Hooplehopper soul-line, Velvet Archive, Golden Wingers, sealed doors, forge engine, LoRA asset mine.

EDGES

See edges.json. Admitted links only:

- Mother silence → Jake's containment | – | lifelong → S1 | high | canon
- Land wound ↔ family silence | mixed | S1 arc | high | canon
- Federstahl Lattice → Wyoming Rift / fissures | – | historical lag | high | canon
- Soul-line / mythology → wound (must serve) | + when obeyed | continuous | high | Book One
- Weaver breath → VUORSE memory | + | per review | high | HITL
- Sealed doors → public surface (firewall) | – | always | high | code + doctrine
- Jake's choices → naming the mother | + | episode to season | high | Book One Ch IX

PROPAGATION

Primary chain — this land holds a **wound-first prestige TV spine** welded to a **human-gated synthesis forge**:

- 1 Doctrine crowns everything (Book One).
- 2 Season 1 filter: every choice must move Jake toward speaking his mother's name.
- 3 Speakable geography lives under canon/; writers-room ops under docs/writers-room/.

- 4 Drafts spawn in `synthetic_enrichment/generated/`; only Weaver-labeled vessels may proceed.
- 5 Silicon enforces the same veil the doctrine names (`apocrypha`, `roadmap_manifest`, `hooplehopper_totality`).
- 6 `worldforge/` was empty at cutoff; this run hangs the first Gray Eye artifacts (assumption → sealed).
- 7 A large untracked LoRA ore vein sits at `Slayverse/assets/lora_training/` — asset forge, not lore promotion.

BRANCHES

Branch	Weight	One-line outcome
B1 Seal this recon into <code>worldforge/recon-2026-08-03/</code>	likely	Gray Eye gains a permanent foothold; later sims have a baseline
B2 Run a named what-if from open threads	plausible	Causal memo on a specific gap (Eli, six fissures, century gaps)
B3 Dig the LoRA / pitch-deck asset mine	plausible	Visual continuity map without touching lore status
B4 Open sealed doors under explicit Weaver invocation	stretch for <i>this</i> ask	Finale / Ch II / walled debrief — only if you lift the veil

HUMAN DECISIONS

- None roleplayed. Steward of the world approved sealing this baseline recon. No sealed actor packets issued.

CONTINUITY FLAGS

- **Forge was empty:** no prior Gray Eye runs under `worldforge/` at cutoff (canon of filesystem).

- **Soft spots already marked in-source:** spelling Hooplehopper/Huppelhopper; Lattice timeline tension; century gaps — catalogued in canon/open_threads/open_threads.md, not fixed here.
- **Promotion candidates:** none — observations only; no new lore claimed.

LABELS AUDIT

All load-bearing claims tagged canon, inference, or assumption. Sealed-body contents omitted (path-only). Simulation claims: zero (no what-if run). Unlabeled claims: zero.

Artifacts this run:

- meta.md
- baseline.md
- nodes.json
- edges.json
- branches.md
- report.md

Canon, sealed layers, and lore sources were not edited.
